Address

Bengaluru

Skills

- **Web Technologies:** ReactJS, Redux, NextJS, NX, MaterialUI, React Native, JavaScript, TypeScript, HTML5, CSS, Scss, TurboRepo, Ant design, GraphQL, D3 charts, AngularJS, Tailwind, Cursor, AntiGravity, Claude
- **Server-Side Technologies:** NodeJS, ExpressJS, Java, Spring boot.
- **Database:** PostgreSQL, MySQL.
- **Methodologies:** Agile, Scrum.

Education

Bachelors of Engineering (2018)

Malnad College Of Engineering,
Hassan 8.73 cgpa

Pre-university (2014)

Poorna Prajna College, Udupi 86%

SSLC (2012)

Government high school, Sonale
90%

Interests

- Assessing and comparing different gadget technologies.
- Testing Android Custom ROMs.
- Discovering new frameworks and developing mini-projects with them.
- Participating in sports such as cricket, chess, and badminton

Lead Frontend Engineer | React.js, Next.js | AI-Assisted Development

Frontend Engineer with over **8+ years** of experience in building scalable, high-performance web applications. Skilled in converting wireframes into high-quality code using React, Next.js, and modern JavaScript frameworks. Experienced in **micro-frontend** architectures, performance optimization, and real-time data dashboards. Proficient in HTML, JS, AJAX, and CSS, and actively mentoring juniors to improve scalability and user experience. Leveraging **AI tools such as Cursor** for development productivity, code generation, debugging, and workflow automation. Currently exploring **AI agents, MCP servers**, and integrating AI capabilities into developer workflows and product features.

Experience

Lead Software Developer

ConcertAI | Bangalore - (2023 - Present)

- Designed and implemented an **AI-powered prompt** interface with API integration, enabling advanced capabilities such as prompt management, note-taking, and reusable prompt storage to improve developer productivity.
- Leveraged **Material UI and Ant Design** for controls related to Drag-and-Drop, Widgets, Menus, User Interface, and Forms
- Designed and implemented a micro-frontend architecture using **TurboRepo**, enabling multiple independent UI applications to run as modular services while sharing common libraries and infrastructure.
- Refactored the existing application, integrated the **Redux toolkit**, adopted a **micro-frontend** architecture, **Mixpanel** tracking and updated NPM libraries.
- Leveraged AI-assisted development tools (e.g., **Cursor**) in daily engineering workflows to accelerate code generation, refactoring, debugging, and documentation.

Software Developer

Analyttica Datalab Pvt. Ltd. | Bangalore - (2021 - 2023)

- Actively listened to and analyzed customer needs to design tailored technical solutions. Developed user interfaces for complex features, including calendars, **inbox functionality, and real-time dashboards based on graphs**.
- Transformed the entire application into multiple micro front-end services to minimize interdependencies among various modules utilizing **NX Projects**.
- Built the application from the ground up while adhering to best coding practices, such as naming conventions, a modular approach, **linting**, and testing.
- Collaborated with other teams, UX designers, and senior management to stay aligned with evolving **industry standards**.
- Employed **Jira** as a bug tracking system to monitor and manage the history of bugs and issues assigned to junior developers.
- **Led a team of four**, engaging members by breaking tasks down into manageable parts and conducting **pair programming** sessions.

Associate Software Developer

Tata Consultancy Services | Mumbai - (2018 - 2021)

- Created a user interface for analyzing results processed through Hadoop and Spark analytics, utilizing **AngularJS, Angular charts, and D3.js**.
- Employed an **object-oriented** approach in development.
- Possess a fundamental understanding of Spring Boot, microservices, and Angular 5; transitioning AngularJS projects to React.
- Developed flowcharts and solution documents to enhance user clarity, implemented the **CSS Box Model**, and styled web pages using SASS, effectively employing mixins, functions, custom grid systems, grid-area concepts, and flexbox for a responsive application.
- Engaged in team-building activities and collaboration.
